

Training SYSTEMK4

Dry cleaning with SYSTEMK4 The ideal Perc alternative for textile care!

More than 1,200 SYSTEMK4 cleaning machines all over the world – a clear proof of the success of our eco-friendly and highly effective cleaning procedure SYSTEMK4!

With SOLVONK4, we offer you a biodegradable, halogen-free solvent with partially even better cleaning performance as Perc. It is dermatologically tested with “Very Good“ and, according to CLP, neither a hazardous material nor a hazardous substance.

With SYSTEMK4, we set new standards. Our goal: a sustainable positive global change in textile cleaning. A promising route in times of increasing economic and ecological demands – for you and your customers, too!

A training on SYSTEMK4 and the handling of the system products allows you to convert your operation to the new solvent and to be ready to face the future.

Please apply on time, as the number of participants is limited to 8!

Application for training: SYSTEMK4

Training SYSTEMK4

Cleaning results as with perc AND favourable ecological classifications – this is what SYSTEMK4 offers. With this new cleaning procedure, you offer your customers professional and environment-compatible textile care without compromising the quality – this will convince even most demanding customers!

Our training teaches you comprehensive technical knowledge on the cleaning procedure itself and the system products but also on fundamental issues such as fiber technology, textile sorting, spotting and textile finishing. You can put the acquired knowledge into practice in our practical exercises!
